

August, 2017 – *DividendRank* Report

<http://www.dividendchannel.com/>

History has shown that the bulk of the stock market's returns are delivered by dividends. Only consistently profitable companies can afford to keep paying dividends, so profitability is of critical importance. And investors shouldn't pay too expensive a price to buy a stock, even if the company itself is strong. So therefore, dividend investors should be most interested in researching the strongest most profitable companies, that also happen to be trading at an attractive valuation.

Each month, Dividend Channel screens through our coverage universe of dividend paying stocks, to look at a variety of data – dividend history & yield, book value, quarterly earnings – and compare it to the stock's trading data to come up with certain calculations about profitability and about the stock's valuation (whether we think it looks "cheap" or "expensive"). Our proprietary DividendRank formula ranks stocks within the following 18 sectors/categories, to identify the top most "interesting" ideas that merit further research.

Kimbell Royalty Partners LP

Kimbell Royalty Partners owns and acquires mineral and royalty interests in oil and natural gas properties throughout the United States. As an owner of mineral and royalty interests, Co. is entitled to a portion of the revenues received from the production of oil, natural gas and associated natural gas liquids from the acreage underlying Co.'s interests, net of post-production expenses and taxes. As of December 31, 2015, Co. owned mineral and royalty interests in approximately 3.7 million gross acres and overriding royalty interests in approximately 0.9 million gross acres, with approximately 44% of Co.'s aggregate acres located in the Permian Basin.
